Professional Summary

AWS Certified Solutions Architect – Associate with hands-on experience in designing, deploying, and managing scalable cloud infrastructure across AWS and Google Cloud Platform (GCP). Skilled in Infrastructure as Code using Terraform and building production-like cloud environments including high availability systems, static website hosting, CDN integration, and secure HTTPS deployments. Passionate about Cloud Engineering and DevOps practices.

Technical Skills

Cloud Platforms:

- AWS (EC2, S3, CloudFront, IAM, VPC, Route 53, ACM, ALB, ASG, NAT Gateway)
- Google Cloud Platform (GCE, GCS, Cloud CDN, Cloud DNS, Load Balancer, MIG, Cloud NAT)

Infrastructure as Code:

- Terraform

DevOps Tools:

- Git, GitHub
- CI/CD (GitHub Actions)

Programming:

- Python
- C++

Concepts:

- Networking (VPC, Subnets, Routing, Firewall Rules)
- High Availability & Scalability
- Load Balancing
- Security & Access Control

Live Projects (Production Deployments)

Featured Project – AWS Static Website with CloudFront & HTTPS

- Designed and deployed a production-ready static website on AWS
- Hosted website on Amazon S3 with CloudFront CDN
- Implemented HTTPS using ACM SSL certificate
- Configured DNS and optimized global content delivery

Live Demo: <https://d1jskvl1ulsdp8.cloudfront.net/>

GitHub: <https://github.com/ahmedgouhar/cleanora-portfolio>

GCP Scalable Infrastructure (VM Template + MIG + Load Balancer)

- Designed scalable architecture on GCP using Compute Engine
- Created VM Instance Template for automated deployments
- Configured Managed Instance Group (MIG) for auto scaling
- Implemented Load Balancer for traffic distribution
- Built custom VPC network with firewall rules
- Configured Cloud NAT for private instances internet access
- Ensured high availability and fault tolerance

Live Demo: <http://35.244.141.12/>

GitHub: <https://github.com/ahmedgouhar/cleanora-GCP-projects>

GCP Static Website Deployment using Terraform

- Built cloud infrastructure using Terraform on Google Cloud Platform
- Hosted static website on Google Cloud Storage (GCS)
- Configured Cloud CDN for performance optimization
- Implemented HTTPS Load Balancer
- Managed DNS using Cloud DNS

Live Demo: <https://storage.googleapis.com/cleanora-static-site/index.html>

GitHub: <https://github.com/ahmedgouhar/cleanora-GCP-projects>

AWS Scalable Web Infrastructure (VPC + EC2 + ALB + ASG)

- Designed and deployed a highly available AWS architecture
- Built custom VPC with public and private subnets
- Implemented EC2 Auto Scaling Group for scalability
- Configured Application Load Balancer (ALB)
- Integrated Internet Gateway and NAT Gateway

- Applied routing tables and Security Groups

GitHub: <https://github.com/ahmedgouhar/aws-vpc-asg-infrastructure>

Certifications

- AWS Certified Solutions Architect – Associate (SAA)
- AWS Certified Cloud Practitioner
- AWS Cloud Quest

Education

Bachelor of Commerce (English Section)

Graduated: 2022

Languages

- Arabic – Native
- English – Fluent (Professional working proficiency)
- Italian – Intermediate (Conversational level)

Additional Information

- Strong interest in Cloud Engineering and DevOps
- Hands-on experience with real-world cloud deployments
- Experience with multi-cloud architectures (AWS & GCP)
- Passionate about automation and Infrastructure as Code
